Abstract

Global human population grew in random uncontrolled natural growth process with helplessness and prevailing situation of darkness. Human gender theory evolved in early years of 20th Century could produce unexpected results with plentiful aberrations, which became subject of pondering of gynecological concern. There occurred family gender misbalances. This author brought a Godly plausible prismatic gender balancing as new advancement in human biology. Theory transformed in manifestations and their applications revealed several unknown aspects of the reproduction with empowering capability of bringing dream world with multiple benefits. This objective of the present study was to disseminate new updates on human biology that will empower gentries create new dream world.

Keywords: Development enlightening, Gender balancing, Genetic theory .

Introduction

Worldwide human population was fore casted to be over 9 billion by year 2030. The population growth follows random natural process, which was accepted as per Gods will. There occurred lot of atrocities towards women and female children. Norms fixed by cognitive thinking and people followed paths getting Godly blessing for one's own family developments. The working populations have got reducing, making shortage of working manpower to run expanded business in the highly developed countries. Thus, population grew in unexpected creating scenarios. There occurred helplessness and families accepted as Gods will. Many socio cultural trends got established as per cognitive thinking and adopting as customs. The thought provocateurs exploited situation as revealed upcoming of Temple, Mosques and Churches with ideologies and eternal trusts. With time the cognitive thinking have taken new advancements of Cognitive science, where upcoming of trust verifying examples will take time becoming

convincing facts. The situations of the past existed even today as case appearing today's daily news paper reporting unfortunate death of 8 worshipers in stampedes at Nalanda, Bihar, [Hindustan, 2026], rushing in over 25,000 nos which had been at one time esteem Centre of academics in India. Such rush had become a regular event in different temples and locations. This case report pertains about Kamalha Devi temple in vicinity of Varanasi. People rushing to Shrine for acquiring Godly blessings, be first or balancing of genders in the family. As brought out the aforesaid situation, this has been a worldwide situation with one or other religious or spiritual believes. Thus, there might be some change and shift of modality with moving century, demanding to have appraisal of human biology that had moved in long span of time domain.

Genetic theory got discovered one and quarter Century ago [1]. The theory served as a basis for academic justifi-

cations and making expected results of upcoming genders. But, there occurred lot of aberrations, making people lose trust in the gender theory. Study [2] brought a deep study of pondering well known cases of family on total 24 cases of varying natures, which enabled bringing interesting lessons of gynecological concern. This study enabled bringing new perfections in xx-xy (female -male) gender theory and beyond. Study by [3] brought a Godly plausible prismatic gender balancing [3]. Studies were brought that disseminated multiple benefits of family level making mother and father care umbrella and transforming old age social welfare of the aged parents, which otherwise were not brought in academic scenario. The study progressed in bringing several benefits of building new sociology, developing child care from zero to hero and creating new personality by overcoming bad personality [4-6].

In the recent year ie 2025 and beyond many studies were brought, which enabled disclosing many unknown facts on twin births of esteem values. In 2025 the Godly plausible prismatic family gender balancing was further updated on enhancing its utility in revamping the United Nation's sustainable development goal (SDG) of [7] in excellent way revamping all 17 areas in short span of time bringing immediate showing results. The gender balanced family was shown to acquire safety, security from any kind of unpleasant situation, which will enable females prosper in professional education in bringing equality, which otherwise cannot get acquired due to natural physiological development with age of female genders. The advantages of balanced family genders will bring automatic population control to a ripple effect influencing multiple areas such as education, health, economic growth and more. An instance can be cited that when wide spread cry on huge growth of population prevailed in India, imposition of enforced birth control resulted in loss of Government. Thus, Godly plausible gender balancing will revamp utility and enable bring a wonderful new dream world. In addition some new updates have emerged, which will become exemplary innovative advancement in human biology of widespread interest. Objective of the present study was to bring new updates that will help bringing the envisaged new dream world.

Materials and Method

Status of Godly Plausible Prismatic Gender Balancing

The deep studies of well-known cases to the researches case by case inducing pondering about developments produced highly interesting scenario. The classification of the cases under study in balanced gender families, one having only female gender children, other having only male children and no females and fourth having mixed gender developing families. The study reveals situation of survival or health and wellness of both mother or/and father, developing baldness, which were documented in study [8].

How the Godly Plausible Prismatic Gender Balancing works?

Deep case by case of groups of situations enabled fixing biological factors, which might have differed in different groups of couples coming under study. The most crucial factors had been development of varying levels of pH of urines of individuals, which formed acidity in reproductive tracts. Separate study was reported on this aspect.

What is Objective Fasting

The researcher has been patternising new theme food is medicine, that enabled bring innovative development of overcoming such harming situation.

Development of Genetic Food

Author presented an article as speaker at World summit on food science and Nutrition in City of Bern, Switzerland from October 14-16, 2024. The theme of the presentation was under the name of Genetic Legacy Conservation Fasting>>Healthy Family New World.[GESLISCOF>>HFNW]. During this genetic fasting an innovative food menu was developed for the fasting periods, which comes differently for individual couples, to take two chance to bring balanced genders in family, which might have one son and one daughter. The content of presentation was highly applauded in Carpathian Journal of Food Summit Science and Technology, an parallel platform for presenting ground breaking research and fostering innovation.

Developing Advantage of Having Gender Balanced Family.

The documentations in balanced family showed a mentions made about benefits to family, to society, community, acquiring professional education to acquire gender equality. The authors study [7] supplementing all aspects of Sustainable Development Goals of the United Nations, which were brought to have no possibility of bringing gender parity even taking time of 165 years. This research exemplified the worthiness of the Godly plausible gender balancing bringing plentiful improvements in all 17 areas in to dream world. There will be several other benefits that will be appearing in the result part of the study.

New Developing forms Aberrations in Gender Balancing

In addition to unpleasant aberrations leading to development of Godly plausible prismatic gender family, which had been fortified, some new type of aberrations have been flashed on it showing helplessness in human biology. There are coming of plentiful cases on transgenders; both male as well as females. In the medical fraternity Doctors advised pre conception consultation of doctors, but so far there had been no concern on the transgenders. It seems that Genetic Legacy Conservation Fasting>>Healthy Family New World [GESLISCOF>>HFNW] should be helpful in reducing such cases. Although this is an speculative, but there had been no

way to acquire otherwise any clue. Development of aberrations of twin births ere studied and a highly promising insight could be acquired. Following this, ameliorative measures were resolved to safe guard parental legacies, which otherwise gets lost in one of the two twins.

Acquisition of data set for supplementing new aspects emerging in the studies,

Since the aspects are new insight it might take some time to acquire some more cases that will enable understanding situations on transgenders.

Results

Present Status

The Godly plausible gender balancing devised in 2023 have made substantial progress on its worldly academic acceptance with bring theory in manifested practice for widespread adaptations. Study established that in spite of long time span the situation mis balance in family gender balancing still prevails, revealing slow pace of improvement in coming up years.

The biological facts about Godly plausible family gender balancing

The known case by case study enabled fixing biological factors, which lead to development of misbalances in family genders. Such misbalances came adversely causing restrictions hindering non sustainable development goals. A crucial factor in developing hindrances was the pH of urine of contributing development of genders. Reactions on the clinical trials were highly promising and applauded [8]

Sanctity of objective genetic fasting

The sanctity of objective genetic fasting was highly regarded and innovations of world category in human biology as one prominent one the Godly plausible prismatic gender balancing. This novel research makes it a Godly blessing enabling author bringing a wow innovation in human biology, which had not come in human biology. Thus, it is a wow research not merely facilitating daily life, but having prismatism to bring gender balanced family for which people move to seek godly grace. This Godly creating transformation infuses

new empowerment in human biology that enhances bringing dream world.

Reappraisal of benefits arising from the gender balanced families

The author documented multiple benefits that could be foreseen in various research article elaborating revelation of health and wellness of mother, father alone and/or together. It revealed much gynecological concerns. The advantage of supporting all 17 factors certainly builds dream world. The study enabled inducement of pondering on upcoming problems associated with twin births. In Kerala and Tamilnadu cases of twin births were reported 45 twin girls/1000 births. Contrary to this, births of twin boys at Jalandhar, Punjab, India is another contrast in gender aberrations. While there exist always situation of pleasures, but so far implications were not known to the scientific communities involved in human biology and medical fraternity. The authors study on twin births acquired to be another unique advancement in human biology, which implicated conservation of legacies of any kind. In such cases the Godly plausible prismatic prismatic gender balancing will ensure conservation of such legacy losses [9].

Proving as genetic avoidance of becoming transgender

The Godly prismatic gender balancing enables bringing gender balancing, which might have occurred due to a kind of aberrations. The manifested practice involves taking all possible cares onwards avoidance of any likely stress; this measure might be helpful in avoiding occurrence of such genetic aberration causing tremendous helplessness, without any expected developing remedy in medical fraternity in the world. Thus, this also certainly proved to be a unique pondering in search of plausible solution.

Time line in situations of advancements in human biology

Situation family gender balancing is shown in table. It is highly desirable to have gender balanced families to harness multiple benefits. Many implicating situation can get ameliorated. The Godly plausible prismatic gender balancing involving genetic fasting hopefully will hinder development of the situation resulting in occurrence of the trans gender.

S.No	Period	Situation of mis gender balance	Godly situation	Remedy	Peoples' endeavors	Remarks
1	Prior to gender theory	Family gender mis balance	Family gender mis balance	No remedy perceived	Envisaging	Godly plausible prismatic gender family should flourish
2	Year of Gender theory	1905	Family gender mis balance	No remedy perceived	Envisaging	
3	2023	Godly plausible gender balancing	Gender balanced Family	No remedy perceived	Envisaging	
4	2026	Transgender	Expanding	No remedy perceived	Envisaging	

5	2026 Beyond	Improving situa- tion	To be gauged	Warranted	Envisaging	
---	-------------	--------------------------	--------------	-----------	------------	--

Table 1 scenario of existence family gender balances.

New appraisal of ecosystems and working of parallel such networks

A new concept was devised on human body consisting different organs, which perform function of production, consumptions and leaving some waste products. Such systems are called as ecosystems and comprising several parallel networks [10], which implicates that in order to keeping good health and wellness entire body should be looked at it. Any discomfort and stress causes fatigue disturbing such normal functioning of the subsystems. The objective genetic fasting by both partners supplement such wellness, hence body subsystems will keep all organs functioning normally. The functional discrepancy will get taken care by the good health and wellness created by the fasting with highly suitable nutrition. This new vision needs some study where one can expect some positive result becoming a new measure for overcoming problem of making transgender, which can be difficult to find any remedy. Therefore, any ailment on health and wellness should be attended to and cured completely, Otherwise, with time biological magnification will lead to devastation size problem.

Discussion

This section was devoted to ratify results brought out in the study to overcome skepticisms that might emerge in the readership.

How the study really forms Godly plausible prismatic gender balancing

The study made deep case by case study of known cases of real situations and it made use of insight of what had gone responsible, which was confirmed by number of cases. There had been no other manoeuvration in the process, hence it was real natural brought as per Gods will, was nomenclature as Godly plausible, for which gentries seek different god's blessing as established in the introduction part of the study.

How prismatism got involved in the study

Prismatism means creating a designed product. The envisaged fact was to bring gender to overcome misbalances in family. This author acquired insight and needed manoeuvration to bring baby by choice and not by chance. Some business groups have brought their own way of rendering business on designer baby in U.S.A. to business. Author group developed care of child to bring from zero to hero. Further, they had infused new personality to enable manage their own affairs.

What are benefits of Godly plausible gender balancing accrue for family

Family, neighbor, society and communities get benfeted from balanced genders. In the balanced family there is always accompaniment of brother with sister, which takes care as a guardian, hence no miscreants venture to play mischief, as it happens with alone girls in isolation and darkness. In the gender balanced family there exists a different environment of cordial coherence.

There occurs survival of parental or otherwise earned family base legacy with balanced family, which otherwise get lost in gender misbalanced families. This occurred due to existence of situation of a kind of helplessness. This had been quite visible appearance of case in India culture having only one wife. In contrast this situation are not encountered in countries where males keep more than one wife. But, as brought out in introduction part of the study cognitive thinking vary making thinking different from place to place.

The study had established benefits to all 17 areas of U,N sustainable development goal to enable bring dream world. There occurred development of secondary resources with gender balanced family that will prosper science and technology without going to wastages of resources in learning and redoing. The skills become family specialty.

Godly plausible prismatic gender balancing could enable bring several unresolvable situations

Cases of twin births were resolved in study [Yadav and Yadav, 2025b], with revealing facts, which can get overcome by the Godly plausible gender balancing. Alike cases of transgenders posed as an open challenge for which a way was needed to be developed. There as well, the Godly plausible gender balancing manifested promoting adoption ie genetic objective fasting should expectedly prove effective in halting such aberrations in super misbalanced gender in families. This will enforce a new empowerment in human biology.

New facilitation of human body working as an ecosystem of parallel networks.

This new appraisal facilitates creating health and wellness.

Conclusion

This innovative study on Godly plausible prismatic gender balancing was brought in year 2023 and made consistent progress of acquiring International recognition and applauding appreciations in 30th Gobar international clinical trial Webinar. It enabled bringing multiple benefits to bring dream world and creating decent environment overshadowing

atrocities towards women and girl children. Study enabled producing baby by choice and not by chance, as has been situation in the past. The study declared a new challenge with some indication of possible way to overcome the prevailing helplessness with transgender. These innovations brought situation of better human biology.

Declaration of no Conflict of Interest

Author duly declared that there existed no conflict of any interest for authorships. Likewise, there was no any clash on any issue related to financial assistance.

Acknowledgement

The author duly acknowledged resources from where cited references were drawn in support of statements made in preparation of the manuscript.
